

## **IN THE CLAIMS**

This listing of claims will replace all prior versions, and listings, of claims in the application. An identifier indicating the status of each claim is provided.

### Listing of Claims

1-28. (Canceled)

29. (Currently Amended) A method for remotely determining ~~the~~ a configuration of a computer of a multimedia content user, comprising:

- (a) ~~sending~~ player detection code to the user's computer;
- (b) ~~receiving~~ configuration information regarding the user's computer; and
- (c) ~~sending~~ a modified information header instruction to the user's computer,

wherein the detection code fetches estimated data corresponding to the configuration of the user's computer via a sub-routine which determines an optimal timing block for a bandwidth measurement.

30. (Currently Amended) The method of claim 29 [[,]] further comprising:  
sending a unique client ID.

31. (Currently Amended) The method of claim 29 further comprising: [[,]]  
the-instruction receiving occurring after the sending of the modified information header instruction, and

the modified information including some information that was not included in the sent information.

32. (Currently Amended) The method of claim 29 further comprising: [[,]]  
the instruction receiving occurring after the sending of the modified information  
header instruction, and

the modified information excluding some information that was included in the sent information.

33. (Currently Amended) The method of claim 29 further comprising: [[,]]  
the modified information header instruction being sent prior to the receiving, and  
the configuration information received being prepared according to the modified  
information header instruction.

34. (Currently Amended) The method of claim 29, wherein the received  
configuration information ~~including~~ includes one or more adaptations.

35. (Currently Amended) The method of claim 34, wherein the one or more  
adaptations ~~comprising~~ comprise a hardware adaptation.

36. (Currently Amended) The method of claim 34, wherein the one or more  
adaptations ~~comprising~~ comprise a user interface version adaptation.

37. (Currently Amended) The method of claim 34, wherein the modified header information instruction being is prepared according to the adaptation information.

38-51. (Canceled)

52. (Currently Amended) A computer-readable medium adapted to store program code~~One or more processor readable storage devices having processor readable code embodied thereon, said processor readable code~~ for programming one or more processors to perform a method for remotely determining the a configuration of a computer of a multimedia content user, the method comprising:

- (a) ~~sending~~ player detection code to the user's computer;
- (b) ~~receiving~~ configuration information regarding the user's computer; and
- (c) ~~sending~~ a modified information header instruction to the user's computer,

wherein the detection code fetches estimated data corresponding to the configuration of the user's computer via a sub-routine which determines an optimal timing block for a bandwidth measurement.

53. (Currently Amended) ~~The one or more storage devices~~ method of claim 52, ~~the method~~ further comprising sending a unique client ID.

54. (Currently Amended) ~~The one or more storage devices~~ method of claim 52 further comprising: [[,]]

the-instruction receiving occurring after the sending of the modified information  
header instruction, and  
the modified information including some information that was not included in the  
sent information.

55. (Currently Amended) The ~~one or more storage devices~~ method of claim  
52 further comprising: [[,]]

the-instruction receiving occurring after the sending of the modified information  
header instruction, and  
the modified information excluding some information that was included in the  
sent information.

56. (Currently Amended) The ~~one or more storage devices~~ method of claim  
52 further comprising: [[,]]

the modified information header instruction being sent prior to the receiving, and  
the configuration information received being prepared according to the modified information  
header instruction.

57. (Currently Amended) The ~~one or more storage devices~~ method of claim  
52 further comprising: [[,]]

the received configuration information including one or more adaptations.

58. (Currently Amended) The ~~one or more storage devices~~ method of claim

57,

wherein the one or more adaptations ~~comprising~~ comprises a hardware adaptation.

59. (Currently Amended) The ~~one or more storage devices~~ method of claim

57,

wherein the one or more adaptations ~~comprising~~ comprises a user interface  
version adaptation.

60. (Currently Amended) The ~~one or more storage devices~~ method of claim

57,

wherein the modified header information instruction ~~being~~ is prepared according  
to the adaptation information.

61-74. (Canceled)
